## ***Abstract***

*Now that I'm ARCing (after retirement careering) I'm free to do whatever I like, and one of the things that I like to do is to study PhD level pure math and mathematical physics intensively, and then once I feel I've mastered a topic, to give a lecture on it in my living room, to video it with my camcorder, and put the video on youtube for the world to see. It is my form of benefaction in my old(er) age. I call it "freeprofinfing." If many ARCing professors "freeprofinf", this will kill off traditional fee paying universities. This essay explains how this may happen.*

## **1. Introduction**
